

TOP 3 PAIN POINTS OF DELIVERING GLOBALLY

1

Shipments Getting Stuck in Customs

Unexpected restrictions have been brought to your attention on the hardware you shipped into the end country.

2

Dealing With Compliance

Now you need to scramble to get the licenses and paperwork needed to clear through customs. All the while worrying about the additional fees...

3

Additional Storage/Handling Fees

If it isn't already frustrating enough to wait on time-sensitive and crucial paperwork, your shipment is in quarantine and accruing additional storage and handling fees. Not only is your shipment delayed, your project is also delayed.

LOOKING FOR SEAMLESS, STRESS-FREE SHIPMENTS ACROSS THE GLOBE?

BlueChipTek's Global Logistics team has transformed complex shipment processes to a science, as they understand and anticipate all documentation and pre-customs filings.

From the vast global logistics knowledge the team possesses, you can rest easy knowing your shipments **won't experience any of these pain points.**

BLUECHIPTEK'S RESULTS:

Global Logistics reach across **six continents**

200+ On-Time global shipments in 2017

Successful deliveries into **60+ countries**
